

Four Corners Development Group (FCDG) has released FCDG Kayak, an interactive Kayaking game for the BREW platform. Kayak down the river, avoiding obstacles. Flip your Kayak to let floating obstacles pass over you. Don't stay upside down too long, or you will drown!

Founded in 2001, FCDG is a software development and multi-media company with offices in San Diego, California, and Silver Spring, Maryland.

Four Corners Development Group is actively developing games for the BREW platform, and anticipates the release of multiple titles this year.
